

NEW Bennington Rear Wheel Steering Fun Bug

Designed and built for wheel chair and semi ambulant drivers.

“Having already purchased a rear wheel steer Bennington Fun Bug last year, the committee at Springbridge decided that the benefits of the rear wheel steer bug proven to be ideal for use in the outdoor school, should be made available to our wheelchair members also. It was therefore decided to purchase a new wheelchair accessible rear wheel steer Bennington Fun Bug.

It has proven to be a very versatile carriage well suited to country road and off-road drives, as well as undertaking a cones course in the outdoor school. It is a vehicle that is well liked by our members and also our volunteers who really appreciate the ease of loading the wheelchair member onto the vehicle due to the low floor of the carriage. Another positive is the ability of our more ambulant members to get onto the vehicle from the rear and walk between the seats. We are very pleased with our purchase and would have no hesitation in recommending this vehicle.”
