

July 2016

Miles of smiles:

Project Enganches Solidarios (Solidarity Carriages) helps children, either with physical or mental disabilities enjoy the parks of Seville in Spain.

The Bennington Rear Wheel Steering Fun Bug, has been adapted for wheelchair and semi-ambulant drivers. Run by volunteers, the project is making a difference to the lives of youngsters who might otherwise feel excluded from simple, everyday pleasures, like a walk in the park.

"We find the carriages very stable, comfortable and easy to move, we are very happy!"
